Problem-Solving,
Team Collaboration, Adaptability,
Communication

Summary

I build full-stack applications that solve real problems for users and businesses with a focus on usability and reliability.

Experience

Founder & Full Stack Engineer   August 2024 – Present
Premove.App – Fleet Management SaaS, Raipur

- Built a cross-platform fleet management app and is piloted by **Re Sustainability Ltd (Ramky Group)**.
- Automated vehicle tracking & analytics, cutting manual coordination time with **real-time** reporting.

Software Engineer Intern   May 2025 – July 2025
Accenture, Bengaluru

- Built REST APIs and automated workflows in Java Spring Boot & Camunda, improving reliability and reducing manual monitoring.

Student Ambassador   August 2025 – Present
Google, Remote

- I host peer learning sessions, run cool, hands-on events at our college campus on behalf of Google.

Projects

Premove.App
Fleet Management SaaS Platform
Tech: React.js, Ionic, Firebase

- Designed & deployed real-time fleet tracking with live driver analytics.
- Integrated CI/CD & Firebase Cloud Functions for automated operations.

API Workflow Prototype (Accenture)
Backend Automation Project
Tech: Java, Spring Boot, Camunda

- Automated API issue routing & monitoring workflows.
- Linked ServiceNow for auto-ticketing, reducing manual triage by **40%**.

Client Web Projects (Freelance)
Shreejee Automobiles, Capital Diesels, SmartGST Suite, MM Agri
Tech: React.js, Next.js, Node.js, JavaScript, TypeScript, Firebase

- Delivered 4+ production-grade web apps improving client visibility & business workflow.
- Integrated Firebase, SEO, and responsive UI for performance-driven deployments.
